User Personas for OpportunityFinder AI

User personas are fictional characters based on the types of people who would use an app. They help explain who the app is designed for, what users need, and how the app can help them.

Here are three realistic user personas for OpportunityFinder AI.

Persona 1: The High School Student

Teenage Girl Outside School

Name: Maya

High school student

17 years old

Occupation or student status: High school junior who wants to attend college after graduation.

Goals:

- Find scholarships to help pay for college.
- Get accepted into a good university.
- Discover opportunities to study abroad.

Challenges:

- Her family cannot afford expensive college tuition.
- She does not know where to find scholarships.
- She feels overwhelmed by application requirements and deadlines.

How OpportunityFinder AI would help her:

- Recommend scholarships based on her grades and interests.
- Show her study abroad programs with financial assistance.

- Help her understand applications and keep track of deadlines.

Quote:

"I want to go to college and experience new things, but sometimes I feel like money is holding me back."

Persona 2: The First-Generation College Student

Why Choose a Private College or University? - Ready Set College by SAGE Scholars

Name: Daniel

College student

19 years old

Occupation or student status: First-year college student and the first person in his family to attend college.

Goals:

- Find grants and scholarships to help pay for college.
- Participate in an international exchange program.
- Find internships to gain work experience.

Challenges:

- His family has limited experience with the college application process.
- He struggles to find reliable information about financial aid.
- He has difficulty balancing school, work, and applications.

How OpportunityFinder AI would help him:

- Find grants and scholarships that match his situation.
- Discover affordable study abroad and exchange programs.
- Organize applications and receive reminders about important deadlines.

Quote:

"I am proud to be in college, but I wish I had someone to guide me through all the opportunities available."

Persona 3: The Student Exploring Future Opportunities

Headshot of multiracial teenage boy in library

Name: Jordan

High school student

15 years old

Occupation or student status: High school sophomore who is beginning to think about college and his future career.

Goals:

- Learn about different career paths.
- Find free summer programs and educational camps.
- Discover opportunities to travel and study in other countries.

Challenges:

- He does not know what opportunities are available to younger students.
- He has limited access to college and career guidance.
- He is unsure how to prepare for college early.

How OpportunityFinder AI would help him:

- Recommend summer programs, competitions, and educational activities.
- Show opportunities based on his interests and age.
- Provide simple college preparation tips and helpful resources.

Quote:

"I know I want to do something big in the future, but I don't really know where to start."

Quick Comparison of the Three Personas

Persona	Age	Main need
Maya	17	College scholarships
Daniel	19	Financial aid and study abroad
Jordan	15	Early educational opportunities

What These Personas Teach Us

These three personas show that OpportunityFinder AI can help students at different stages of their education.

- Maya needs help finding financial support for college.
- Daniel needs help navigating college opportunities and financial aid.
- Jordan needs help discovering opportunities and planning for his future.

Overall, the app is designed to make educational opportunities easier to discover for students who may not have access to traditional guidance or resources.

The goal is to make sure students do not miss opportunities simply because they don't know where to look.

I can also help you turn these three personas into a professional user persona presentation page for your school project.
