Idea	Who it helps	Difficulty
StudyBuddy AI	Students who need help studying, understanding lessons, and preparing for tests	Easy
EcoScan AI	Students, families, and people who want to recycle and reduce waste	Hard
MoodMate AI	Teenagers and adults who want to track their moods and build healthy habits	Medium

My Final App Idea

App Name: OpportunityFinder

Problem My App Solves: Many students in lower income communities do not know about scholarships, study abroad programs, grants, or other educational opportunities. Some students miss out on a lot because they do not know about these opportunities they are eligible for. And many students don't know where to start.

Who will use my app:

My app is designed for middle school, high school, and even college students from lower-income communities who want to continue/strengthen their education and explore new experiences.

Why I chose this Idea:

I chose this idea because I believe every student deserves the chance to succeed, no matter their background or income. Many students have big dreams but may not know what opportunities are available for them. I wanted to create an app because students are stressed as it is, and these apps just make it easier for them to access. I wanted to create this app because I just recently studied abroad this summer, and I want everyone to have the same opportunity I had.
